[LEARN MORE](#)

The World Hospital at Home Community is a global platform advancing the hospital at home (HaH) model to deliver patient-centric acute care in the home. By sharing best practices and

fostering innovation, we aim to maximize time at home while ensuring exceptional health outcomes and care experiences.

The HaH model has gained traction in countries like Australia, France, Israel, Italy, Spain, the U.K., and the U.S., with ongoing efforts to expand its integration and impact worldwide. Together, we work to promote its transformative role and benefits in modern healthcare.
